

[Back to Landing AI Careers](#)

Location: United States

Employment Type: Full time

Team: Content

AI is the new electricity. Millions of AI engineers will be required to transform industries with artificial intelligence and we're building the education products to train them. [DeepLearning.AI](#) is providing a world-class education to people around the globe so that we can all benefit from an AI-powered future.

DeepLearning.AI is looking for a Curriculum Architect to work with our network of world experts in the AI space. In this role, you will leverage your expertise in learning experience design to help AI experts produce high- quality courses and effective learning experiences. Your experience as an educator, your technical skills in the AI space and your ability to communicate and work well with a team will all be critical for this role. Although we are headquartered in Palo Alto, California, we are open to remote workers with a preference for being within 3 time zones of California (Pacific Time / GMT -7).

Responsibilities:

- Partner with world-class AI experts to build cutting edge courses.
- Be the instructional design expert that will train and support subject matter experts to help them create effective learning experiences and deliver high-quality content.
- Collaborate in the development and testing of course content, including creating learner projects, code exercises, quizzes, scripts, storyboards and graphics.
- Work closely with a production and visual design team to record videos, add visual design and deliver high-quality multimedia content to support the curriculum.
- Review the work of others and provide constructive feedback on the quality of static content and video as well as code exercises.

Requirements:

- Knowledge of instructional design best practices as well as experience designing and teaching technical courses.
- Technical background in math and programming at a level sufficient to teach an introductory course in machine learning.
- Bachelors in STEM / AI / CS or equivalent industry experience in areas like software development, machine learning or data science.
- Excellent communicator and team player with an ability to author and edit high-quality written content in English.

Preferred:

- Previous experience developing online asynchronous curriculum in the areas of AI, machine learning, data science, robotics or similar.
- Masters or PhD in STEM / AI / CS or related field.
- Industry experience as a data scientist, machine learning engineer or similar.

Team Culture:

- **Strong work ethic:** All of us believe in our work's ability to change human lives. Consequently we work not just smart, but also hard.
- **Growth mindset:** We are eager to teach you new skills and invest in your continual development. But learning is hard work, so this is something we hope you'll want to do.
- **Team orientation:** We care for and watch out for each other. We're humble individually, and go after big goals together.
- **Flexibility:** We are flexible in our tasks and do whatever is needed to get the job done, including the dirty work. Day to day activities on our team could range from lower-level tasks such as script and slide design or writing code, to high-level work such as thinking through corporate strategy.

What We Offer

- [DeepLearning.AI](#) offers a comprehensive benefits package including medical, dental and vision coverage, a 401(k) plan, a monthly education stipend, untracked PTO and much more.

At [DeepLearning.AI](#), we are committed to providing an environment of mutual respect where equal employment opportunities are available to all applicants without regard to

characteristics and testing), military and veteran status, and any other characteristic protected by applicable law. [DeepLearning.AI](#) believes that diversity and inclusion among our employees is critical to our success as a company, and we seek to recruit, develop and retain the most talented people from a diverse candidate pool. Selection for employment is decided on the basis of qualifications, merit, and business need.

You must already have, or be able to obtain, authorization to work in the United States.
