

# Join a Claude Campus Program

Lead student-driven AI initiatives with support from  
Anthropic.

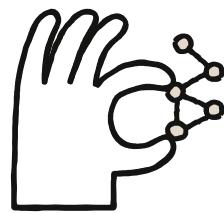

For technical students

## Apply to lead a Claude Builder Club

If you're passionate about building student communities, the Claude Builder Club program is for you.

- Collaborate with Anthropic to set up an organization for AI builders on your campus
- Organize technical and non-technical workshops featuring Anthropic guest speakers
- Run hackathons and demo nights for student builders
- Share regular updates, tips and resources (like API credits) with

For all students

## Become a Claude Campus Ambassador

Launch non-technical outreach campaigns and educational programs on your campus.

- Represent Claude in partnerships with academic departments, student orgs and informal campus groups
- Lead activations across campus and create content to spread the word about why you love Claude
- Host events such as prompting workshops and no-code buildathons
- \$1,750.00 program stipend (pre-tax)

members

- \$1,750.00 program stipend (pre-tax)

Paid 10-week commitment beginning in late August.

If you aren't sure how to make these activities happen, that's completely fine — we'll be providing you with all the necessary tools.

Paid 10-week commitment beginning in late August.

# Why join a Claude campus program?

## ✓ Direct experience with frontier AI research

Collaborate with Anthropic's research, product and education teams to help your campus thrive during the AI transformation.

## ✓ Find your people

Connect with students who see AI as a tool for expanding human capability, not replacing it.

## ✓ Your feedback shapes what we build

Student needs aren't hypothetical to us. Your input directly influences Claude's development.

# Meet our ambassadors

“

Being a Claude Ambassador has been one of the most rewarding parts of my university experience – from planning packed-out AI events to giving direct feedback to the team to shape the future of education. I've built amazing friendships, grown my network threefold, and had the chance to work alongside arguably the most exciting company in the world.

Zain Mirza, LSE

“

Being a Claude Campus Ambassador gave me the opportunity to spark meaningful conversations about AI, not just with students, but also with researchers, professors, and staff across campus. It was exciting to help more people explore how Claude can support their work, while also advancing awareness around safe, responsible AI.

Charles Zuo, NYU
