Join Our Mission to Bridge the Digital Divide - Through AI!

Position: AI Programs Manager / Consultant, K12 - Austin, Texas (Hybrid or Remote)

Salary Range: USD 55,000 - 75,000 annually

Location: Preference for Austin, Texas; remote possible

Travel: Occasional travel required with reasonable notice and accommodations

About Us

Sustainable Living Lab USA (SLL LLC USA) is part of a global movement, HQ in Singapore, offices in India, Indonesia, Japan, and the US, to make technology inclusive, accessible, and sustainable. We design and deliver innovative education programs that equip learners with essential digital and AI skills - from US community colleges to grassroots organizations worldwide.

About the Role

We're seeking a dynamic, articulate, and adaptable **AI Programs Manager / Consultant** to support the global expansion and US localization of our AI education programs.

We are seeking a dynamic, articulation-savvy, and experienced K-12 education professional to lead the implementation of our AI programs within school districts across the US. This role focuses heavily on outreach, consultation, and delivery, ideal for a former teacher, administrator, or district specialist with a growth mindset who can navigate the complexities of K-12 systems and drive large-scale technological adoption.

This hybrid role blends delivery, curriculum design, and program development, ideal for a flexible, self-motivated individual with a growth mindset who thrives in consultant-like, ambiguous environments, constantly finding solutions to new problems.

Key Responsibilities

1. K-12 AI Readiness & District Engagement

- Drive AI adoption across school districts in various states, serving as a key partner to our clients.
- Consult with district leadership, administrators, and teachers to understand needs and incorporate AI into their ecosystem.
- Lead comprehensive AI readiness initiatives, covering infrastructure, specialized labs, K-12 curriculum integration, teacher professional development (TPD), and AI policy recommendations.
- Manage and scale educational programs focused on youth, including out-of-school programs and bootcamps.
- Support outreach to educational non-profits and community organizations to expand K-12 engagement..

2. Teacher Training and TTT Delivery

- Lead in-person and virtual Train-the-Trainer (TTT) workshops for K-12 teachers and administrators across different states.
- Ensure educators are fully equipped to incorporate our AI programs and provide continuous support for their implementation.

- Deliver engaging, beginner-friendly training that translates core AI/Python concepts into practical classroom activities.
- Facilitate experiential coding/skilling events and co-deliver programming to generate AI projects as student outcomes

3. Program Customization and Content Support

- Collaborate with internal teams to evolve existing content and co-create new offerings that align with K-12 frameworks and standards.
- Provide essential feedback and insights from school districts to inform program improvement and localization.
- Assist in the creation of consulting decks, training decks, and program collateral tailored specifically for K-12 stakeholders.

What We're Looking For

- **Experience:** Minimum of 2 years of direct teaching experience in K-12 education. Prior experience in school administration or at the school district level (e.g., curriculum coordinator, TPD lead) is strongly preferred.
- **K-12 Stakeholder Expertise:** Demonstrated ability to effectively communicate with and influence diverse K-12 stakeholders, including teachers, school administrators, and district leaders.
- **Tech & Learning Aptitude:** Intermediate knowledge of Python and foundational AI/ML concepts. Strong interest in emerging educational technology and AI policy.
- **Training & Facilitation:** Strong public speaking skills and proven ability to run dynamic TTT sessions and classroom/workshop environments.
- **Mindset & Toolsets:** Adaptable, self-motivated, and collaborative. Skilled in using tools like Zoom, Google Workspace, and Teams, and eager to learn new platforms and facilitation techniques.
- **Location & Eligibility:** Preference for candidates based in Austin, TX, but open to strong remote applicants. Travel would be common, as you will frequently visit different school districts across states for training and stakeholder engagement. Must be authorized to work in the US.

Why Join Us?

- **Make a Foundational Impact:** Directly shape the future of K-12 education by making AI accessible to students and teachers across the country.

- **Strategic Leadership:** Act as a key consultant for school districts navigating the complex landscape of AI policy and implementation.
- **Creative & Collaborative Culture:** Work with a mission-driven team that values experimentation, equity, and lifelong learning.
- **Featured Benefits:** Contribution to Health Insurance, annual leave, and paternity and maternity leave.

Ready to Apply?

Send your resume and a short, authentic cover letter to aaqib@sustainablelivinglab.org with the subject line: "**AI Programs Consultant - K12 Specialist.**" Please write authentically, and use AI tools with discernment.

Please include:

- Your expected monthly salary in USD
- Your current location and time zone
- Your availability to start
- Any accommodation requests (if applicable)

SLL LLC USA is an Equal Opportunity Employer. We celebrate diversity and are committed to building an inclusive workplace. If you need accommodations during the application process, please let us know.
